PROFILE

Motivated fresher and Front-end Developer skilled in React with experience in building responsive web applications. Familiar with javascript and bootstrap management and team collaboration from academic projects. Eager to contribute to innovative solutions in a dynamic environment.

PROJECT

Turf Booking Management System

- Designed and developed a responsive user interface using HTML, CSS, and JavaScript, ensuring smooth navigation and accessibility across devices
- Created intuitive navigation for pages including Home, Shop, Tournament, and About Us.
- Built a booking form with input validation for name, phone number, and slot selection.
- Implemented a pricing section with clear layout for 5-A-Side and 7-A-Side turf bookings.
- Ensured a mobile-friendly design with interactive buttons and smooth user experience.
- Integrated visual elements and images to enhance user engagement and professional appeal.

Project 2

Gym Website

- Developed an engaging gym website using HTML, CSS, and JavaScript for a dynamic front-end experience.
- Designed responsive layouts to enhance user navigation and accessibility across devices.
- Implemented interactive features, such as class schedules and membership information.
- Focused on creating an appealing aesthetic to attract potential clients and promote fitness services.
