## PROFILE SUMMARY

Looking for a data analyst role in an IT company where I can use my skills in Python, Power BI, and Tableau to solve problems and grow in my career. I want to use my problem-solving skills to find smart solutions and grow in my career.

## PROJECTS

### POWER BI

**Car Sale Performance Analytics**

- Show sales going up or down over time.
- Sales between different salespeople or car models.
- See the most important sales numbers at a glance.
- Let users look at specific regions or time periods.

### TABLEAU

**Country Sale performance Analytics**

- Amazon Prime Video Analysis Dashboard.
- Interactive Dashboard for Amazon Prime Content Analysis.
- Amazon Prime Shows & Movies Overview.
- Prime Video Content Analytics.

### PYTHON

**Weather Prediction**

- Weather Data Analysis.
- Exploratory Data Analysis on Weather Data.
- Weather Trends and Patterns Analysis.

### Machine Learning

- Health Disease Prediction – Built ML model on medical data using Logistic Regression, Random Forest & SVM. Applied normalization & feature engineering.
- ML Workflow Implementation – End-to-end pipeline (EDA, pre-processing, training, evaluation). Applied normalization & ML algorithms (Regression, Classification, Clustering, PCA).

## SKILLS

**TECHNICAL SKILLS**

Python, MySQL , Excel, Machine Learning

**DATA ANALYTICS LIBRARIES:**

NumPy, Pandas, Seaborn, Matplotlib, SciPy, Scikit-learn

**TOOLS**

Jupyter Notebook, VS Code, Chat GPT, Canva, MS Office, Power BI, Tableau
